

PROJECT PROFILE

Breakthrough Fuel
Green Bay, WI | 2022

FAST FACTS:

Breakthrough Fuel made the decision to bring multiple locations together by building a new headquarters in Green Bay, WI.

Through challenges with land procurement as well as the pandemic, they came back with a new plan for the space that would showcase the forward-thinking, edgy culture that sets Breakthrough Fuel apart. With this new space, they are now able to bring all their employees back to the office and offer collaborative spaces and technology to support their company objectives.

From the strategically-branded touch down areas to the numerous collaboration areas throughout the space, the office is equipped with the tools to support their creative, future-facing team and showcases who they are to their community, clients, and staff.

PROJECT SIZE: 38,900 sq ft

PROJECT DURATION: 10 months
