

FAST FACTS:

Perlick Corporation, a premier commercial and residential refrigeration supplier in Milwaukee, WI, was a project that first came about with a goal to bring people back into the office following the pandemic.

Although it was a challenge working in the existing conditions of their original 1965 building, BSI worked around the clock to incorporate free address workstations and ancillary spaces to meet the needs of Perlick's growing team.

Prior to the pandemic, the Perlick showroom needed updates to entice clients and employees to come in. However, following the completion of this project, BSI successfully provided their team with furniture solutions that could not only attract and retain talent but also support Perlick's collaborative, hybrid work model for years to come.

PROJECT SIZE: 13,530 sq ft total, 2nd floor

PROJECT DURATION: 2 Years
