

PROJECT PROFILE

Village of Bayside Dispatch Center
Milwaukee, WI | 2022

In complex environments, such as dispatch centers, coordination of all interior updates becomes increasingly important. Our in-house experts work hand-in-hand to execute each phase in non-invasive ways. From the AV deployment to the furniture placement, this install was completed with minimal disruption so the dispatchers could continue working their critical roles.

KEY FACTS

The Village of Bayside Police Department and dispatch center sought out SMART SPACES and BSI to update their outdated equipment and provide workers with the comfort necessary for their around-the-clock shifts.

Given the preexisting equipment nearing the end of its life cycle as well as the chaotic 24/7 emergency setting, it was of utmost importance to provide the Village of Bayside team with modernized equipment and reliable furniture in the most timely and non-invasive manner possible.

Despite the challenges posed in renovating a public safety department, our teams at SMART SPACES and BSI managed to provide the team with a unique new setup featuring furniture that is both operational for 24/7 usage and comfortable during their long shifts.
