

FAST FACTS:

This project aimed to provide the Village of Suamico Fire Department with a space that could support daytime work and foster a sense of home for firefighters on duty.

Apart from the multidimensional difficulties observed in developing contracts with the client, the largest challenge involved creating an environment that could not only withstand but *thrive* in the high-speed, around the clock atmosphere of a fire station.

From strategic product selection to thoughtful design choices, our team successfully produced a space that will support these first responders and their constituents for years to come.

PROJECT SIZE: 12,000 sq ft total

PROJECT DURATION: 11 Months

PROJECT COMPLETED: 2021
