

BSI and SMART SPACES Services Provided:

- Interior Architecture & Design
- Furniture Design & Install
- Specialty Construction
- Modular Construction | DIRTT Walls
- Audio Visual Integration with SMART SPACES
- AV Programming

To better serve our valued clients and expand our presence in the community, SMART SPACES & BSI opened our Madison Showroom in 2023. Within the space, design and technology seamlessly unite to create unique, integrated, collaborative experiences. The goal was to provide areas that not only highlight the latest in technology, but also showcases how it can coexist with elegant and functional design.

Areas to experience:

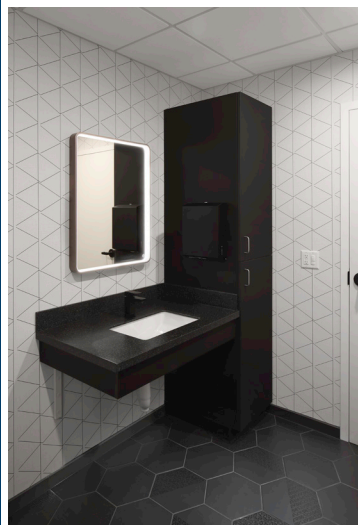

- Kitchenette features a back-lit 138" display as viewed from the 'family table' while guests enjoy the amenities of the hospitality features provided within this zone.
- Live Design Studio, with an entry framed by a unique Timber wall system, provides a space for collaboration with clients, as we view dual monitors to review design concepts and utilize interactive digital tools to make real time changes. Furniture solutions support a variety of postures, for up to 12 guests in person, and unlimited guests virtually.
- Workstation setting features (3) sit-to-stand 'hot desks', equipped with hardware to support quick connectivity of personal devices, supported by ergonomic and storage enhancements for individual adjustment and use.
- Audio Visual Rack enclosure is illuminated to showcase our team's ability to install and maintain clean equipment through intentional 'rack craftsmanship'.
- Various huddle spaces support small group interaction and solo use, with a variety of provisions for quick connectivity of personal devices. Acoustical materials strategically positioned throughout the space absorb sound and noise is dampened via sound masking provisions.
