

reinvent the way you work

# PROJECT PROFILE

BSI Waukesha Showroom | Design Department

Waukesha, WI | 2020

Committing to our tagline and reinventing the way we work, BSI completed a renovation of the Design Department. To encourage skill and knowledge sharing between designers, panel heights were lowered, and workstations were designed to support the collaborative nature of our team.

### Project Highlights:

- Large work islands were implemented for collaboration on project finishes and materials. The islands incorporate pull-out shared trash receptacles, and personal lockers provide associates with hanging space for bags and coats.
- As a working showroom, multiple workstation sizes, layouts and finish combinations are represented to show options.
- Privacy booth equipped with technology was added for associates to utilize during virtual calls or focused work.
- Bell shaped light fixtures wrapped in sound absorptive PET provide a fun aesthetic while dampening sound within the space.
- Hanging acoustical panels bring in a fun aesthetic to the environment while providing privacy to booth users.

**PROJECT COMPLETED:** 2020
